## Run Detail Page Screenshot:

**Selected Run Details and Justification:**

- **Run ID:** 125ab7a6b8d34c25a2e1fbbdf0ed1943
- **Metric (**mae_minutes**):** 1.924653 (or ~1.92 minutes)
- **Justification:** I chose the linear-baseline run because it produced the lowest Mean Absolute Error across all tracked models while offering complete interpretability and zero risk of depth-based tree overfitting.
